

# Staying safe in winter

Spot  
the

# Difference!

A

B

Can you spot the 5 differences between these 2 pictures?

Stay safe when going for a walk in the evening. Make sure you:

- Always walk with a grown up if you need to go out in the dark.
- Wear reflective clothing so cars and other people can easily see you.
- Wear light colours as these are easier to see than dark colours.
- Keep any pets on a lead so they can't run into the road.

# Wonderful Water

Take our water challenge, can you match each picture to the correct explanation? Connect your answers by drawing a line.

I contain 96% of all the water in the world

I'm not as heavy as water so I float on the top

I can be really deep and there are more than 40,000 of us in the UK

I'm a frozen drop of water, each one of us is unique in shape and size

I twist and turn to take the easiest route

## KEEPING SAFE BY FROZEN WATER

Frozen water can be very dangerous, here's how to stay safe around frozen water:

- Don't walk near the edge of frozen water, you could accidentally fall in.
- Never try to walk on frozen lakes and rivers, you can never tell how thick the ice is and you might fall through.
- Always keep your pets on a lead when walking by frozen water
- If you see someone, or an animal, get into difficulty on the ice don't try to rescue them. Call 999 immediately.

# Answer sheet

## Spot the Difference!

**NO PEEKING**

1. The trousers changed colour
2. A missing dog's collar
3. The torch is switched off
4. The dog's lead is missing
5. An undone shoe lace
